Self weathering zinc coating

EuraZinc Pro
Newly painted
(2866005)

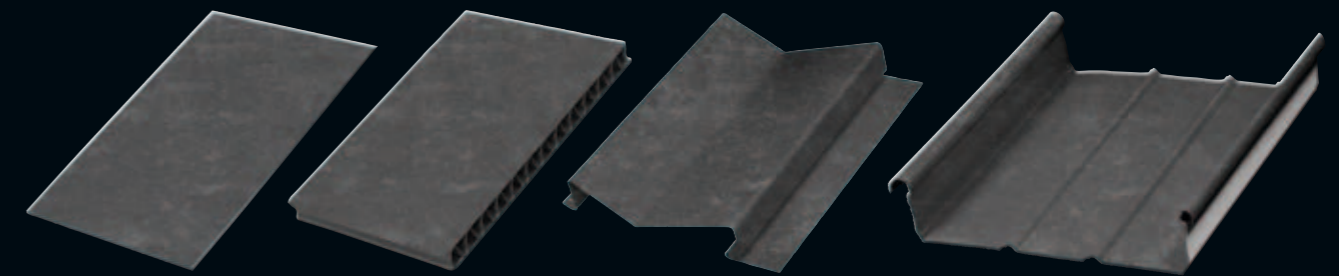

EuraZinc Pro
Weathered

EuraZinc is a unique self weathering zinc finish in pre-coated aluminum. Zinc particles in the topcoat allow the coating to change over time from an initial light grey finish to a dark and natural weathered zinc finish.

EuraZinc saves over 60% of weight in comparison to real zinc and is more price attractive. On top of this EuraZinc allows you to fully exploit the cladding versatility of pre-coated aluminum. Whether you choose for aluminum composite panels, insulated panels or trapezoidal profiles; all are new combinations re-inventing and re-shaping the possibilities of zinc.

Panel versatility
