Active FastClean

EuraBuild Active, coatings that work!

Exceptional dirt repellence

Active FastClean provides your facade with an ultra smooth surface due to the exceptional high level of dirt repellence. Inspired by the hydrophobic properties (high water repellence) of the lotus plant FastClean will simply not allow dirt, stickers and graffiti to adhere.

Additional layer on PVDF coatings

Active FastClean can be applied as an additional clearcoat layer on top of PVDF based coating systems like EuraBuild, EuraMica and AnoMax.

Protect your building

FastClean is a high-end solution for every architect, project engineer and building owner who wants to protect the building against dirt. The product is available in thicknesses up to 2.00 mm and widths up to 1600 mm which enables you to combine FastClean with almost every metal cladding.

Benefits and specifications

- Exceptional dirt repellence
- Applicable on every PVDF system
- Up to 60 gloss units
- Hydrophobic effect of the clearcoat functions approx. 3 years
- Graffiti removal advice available on our website

Hydrophobic effect = High dirt repellence
